

## Expanded Integration Between SnapServer and MOBOTIX Simplifies Management and Implementation of Video Surveillance Systems

March 21, 2012

### Enables Customers to Remotely Configure and Maintain Geographically Distributed Video Surveillance Systems

SAN DIEGO, CA, Mar 21, 2012 (MARKETWIRE via COMTEX) -- [Overland Storage](#) (NASDAQ: OVRL), the trusted global provider of [effortless data management](#) and [data protection solutions](#) across the [data lifecycle](#), and MOBOTIX AG, the technology leader for high-resolution network camera systems, announced today they have strengthened their strategic partnership with the integration of MOBOTIX MxControlCenter with MOBOTIX MxRemotePreview and the [SnapServer DX Series](#) (SnapServer) Network Attached Storage (NAS) products. This solution allows customers to set up and manage IP cameras with any local or remote SnapServer device that is connected to their video surveillance network. Customers can remotely preview and transfer video footage over any distance allowing rapid response to security or surveillance issues regardless of location.

Built upon the award-winning [Guardian Operating System](#), SnapServer supports traditional or [DynamicRAID](#) for seamless storage expansion as capacity requirements change over time. The SnapServer allows storage volumes to grow or shrink dynamically within the video surveillance storage pool without IT intervention, preventing costly over provisioning and unnecessary upgrades. With the ability to expand to over 280TB and seamlessly integrate with MxControlCenter and the MxRemotePreview feature, SnapServer is ideal for companies storing and accessing large amounts of video locally or dispersed geographically.

SnapServer, integrated with MOBOTIX MxControlCenter and MxRemotePreview, provides a centralized interface that simplifies the initial system setup, supports unlimited users and enables companies to:

- create saved search profiles allowing single-click user-defined search queries
- perform video motion search on recorded footage to identify critical events quickly, and
- configure recording paths for multiple cameras in a single operation.

"As we strengthen our partnership with MOBOTIX, it allows us to respond to the growing demand for affordable and easy to install video surveillance solutions," said Joe Disher, Solutions Marketing Manager, Overland Storage. "SnapServer is ideal for MOBOTIX customers because it delivers the performance, scalability and affordability needed to meet a range of video surveillance requirements. Now, with the added integration of MxRemotePreview, companies can take advantage of a solution that can be simply managed and maintained locally or from remote locations around the globe."

#### About Overland Storage

Overland Storage is the trusted global provider of effortless data management and data protection solutions across the data lifecycle. By providing an integrated range of technologies and services for primary, nearline, offline, archival, and cloud data storage, Overland makes it easy and cost effective to manage different tiers of information over time. Whether distributed data is across the hall or across the globe, Overland enables companies to focus on building their business instead of worrying about data growth. Overland SnapServer(R), SnapSAN(R), NEO Series(R) and REO Series(R) solutions are available through a select network of value added resellers and system integrators.
