

Overland Storage Wins 'Hardware Product of the Year' at Network Computing Awards

March 26, 2012

SnapServer DX Series Tops Competition as Best Hardware of 2012

LONDON, Mar 26, 2012 (BUSINESS WIRE) --[Overland Storage](#)^(R) (NASDAQ: OVRL), the trusted global provider of [effortless data management](#) and [data protection solutions](#) across the [data lifecycle](#), has won 'Hardware Product of the Year' with its [SnapServer DX Series](#)(TM) at the 2012 [Network Computing Awards](#). It was also runner up in the 'Data Centre Product of the Year' category.

Now in its fifth year, the annual Network Computing Awards are hosted by Network Computing Magazine in the UK. The awards recognise the hardware, software, services and the companies behind them, which have most impressed the readers of the UK's longest established computer networking publication. The awards were presented at a ceremony on 22nd March at Hotel Russell, London.

Jeremy Zuber, product marketing manager, SnapServer^(R) division at Overland Storage, said: "The SnapServer DX Series was built to have the best features and price of any NAS solution in its class, to enable businesses of all sizes to take advantage of its power, flexibility and ease of use. This award recognises our achievement in creating an ideal solution that offers effortless data management and protection to modern businesses."

The product, which launched in October 2011, offers a unified NAS and iSCSI SAN device that leverages the company's [DynamicRAID\(TM\)](#) technology to completely eliminate the need to provision storage capacity. Expandable to 288TB and featuring an array of integrated enterprise-class features including snapshots, replication and remote management, the SnapServer DX Series enables storage environments to effortlessly scale without downtime while ensuring maximum data protection.

Offering unprecedented flexibility, the SnapServer DX Series is the ideal solution for modern business applications from virtualised server, Microsoft Exchange, SharePoint and SQL environments to digital imaging, web services, storage consolidation and backup.
