

Overland Storage to Showcase the Next Generation of Storage for Schools, Colleges and Universities with Massive Data Growth

December 13, 2012

EXCEL LONDON - 30th January – 2nd February

Overland Storage Booth at Net Ctrl STAND A45

London, 13 December 2012: Overland Storage, the trusted global provider of effortless data management and [data protection solutions](#) across the [data lifecycle](#), and its channel partner Net-Ctrl today announced they will be showcasing two new high performance scalable storage solutions at the BETT Show on 30 January 2013.

The latest generation of clustered networked attached storage, the SnapScale X2, and the award-winning SnapServer DX Series, empower schools, colleges and universities to focus on the business of education, instead of worrying about data growth. Both solutions make it easy and cost-effective to manage different tiers of information over time. Whether distributed data is across the hall or across the globe, Overland Storage solutions enable organisations to either scale up or scale out depending on their needs.

SnapScale and SnapServer solutions enable organisations within the education marketplace to save time and money whilst preventing irrecoverable data loss by:

- Adding high performance storage for file sharing, backup and virtualisation initiatives
- Share data across Windows, UNIX/Linux, and Macintosh Platforms
- Replicate data between multiple locations for disaster recovery
- Backup to disk, VTL or tape

"The BETT show is an ideal place to learn about innovative solutions that can enhance and support the education sector. That's why we're glad to be showcasing the newest SnapServer and SnapScale solutions with Overland Storage. Not only because of their product deployment successes within education organisations, but also because of the ongoing development in the data management and protection solutions that make sense for this space," said Josh Moore, marketing manager at Net-Ctrl.

Andy Walsky, VP EMEA Sales at Overland Storage adds, "One key challenge is to safely store and back-up a never-ending stream of data, whether it's video, files or images, and then keep it safe for the student's lifetime. This sector needs flexible and cost-effective solutions to store and manage data throughout the entire data lifecycle. Overland Storage offers both disk and tape solutions to resolve all of these challenges, allowing users to effortlessly store and protect data without ongoing management costs."
