

Overland Storage Presents SRM Webcast Featuring Enterprise Storage Group Analyst Nancy Marrone

December 5, 2002

'Automate Storage Processes to Manage More Storage with Fewer Resources' Airs Dec. 10

SAN DIEGO, Dec. 5 /PRNewswire-FirstCall/ -- Overland Storage, Inc. (Nasdaq: OVRL), a leading provider of storage solutions, will host a Webcast for IT professionals, "Automate Storage Processes to Manage More Storage with Fewer Resources," featuring Nancy Marrone, senior analyst for Enterprise Storage Group. Scheduled for Tuesday, Dec. 10, at noon EST, the Webcast will focus on the role of Storage Resource Management (SRM) in today's modern IT environments.

Effectively managing storage resources is an IT task that requires accurate information, unambiguous priorities and a set of tools to automate storage management processes. Ms. Marrone will discuss how SRM can help IT professionals best use their storage assets, migrate to new storage technologies more efficiently, facilitate business continuity and disaster recovery planning, plan for SAN and NAS implementations, and shorten backup windows.

"SRM is the one technology that must be in place before you take on any other storage initiative," Ms. Marrone said. "Inefficient use of storage assets increases costs in all areas of IT. Making better use of storage assets will lower costs and improve reliability."

Ms. Marrone has a 16-year history in the computer and networking business with companies such as Hewlett Packard and Tektronix. A recognized IP expert, she joined Enterprise Storage Group in late 2000 to help clients understand the coming Storage and Networking convergence.
