

## **Overland Storage Debuts Multi-SitePAC at Storage Networking World**

April 11, 2005

What: Overland Storage (Nasdaq: OVRL) will publicly demonstrate for the first time in the U.S. its latest software module, Multi-SitePAC(TM). Designed for the REO(TM) SERIES of disk-to-disk backup and recovery appliances, Multi-SitePAC is a remote backup mirroring solution that automates the costly, cumbersome and unreliable manual process of backing up, centralizing and managing remote data -- without requiring changes to backup systems or software. As a result, customers can achieve near-instantaneous recovery, cost-effectively ensure business continuity, meet compliance requirements, and reduce overall storage management costs.

When: Wednesday, April 13, 5:40 to 8:40 p.m.  
Thursday, April 14, 12:45 p.m. to 2 p.m., and 4 p.m. to 7 p.m.

Where: Storage Networking World  
JW Marriott Desert Ridge Resort, Phoenix, Ariz.  
Booth G1

For more To schedule a meeting or for additional information, please information: contact Melinda Hutcheon at [mhutcheon@overlandstorage.com](mailto:mhutcheon@overlandstorage.com) or 800.729.8725, ext. 4187, or visit the Overland Storage booth during the exposition.

### About Overland Storage

For almost 25 years, Overland Storage has delivered world-class data protection solutions designed to ensure business continuity. Focused on backup and recovery, Overland's data protection solutions include the REO(TM) family of disk-based backup and recovery appliances and the award-winning NEO SERIES(R) of tape libraries. Overland sells its products worldwide through leading OEMs, commercial distributors, storage integrators and value-added resellers. For more information, visit Overland's website at [www.overlandstorage.com](http://www.overlandstorage.com).
