

Overland Storage Customer to Share Best Practices for Backup and Recovery

February 14, 2006

National Instruments Achieves 14-month Payback on NEO 8000 Tape Library

What: In an exclusive Webinar, Jeff Mery, data center and enterprise storage manager, National Instruments, will describe how the company tackled growing data protection challenges while speeding backup and recovery time, reducing media costs and achieving a 14-month payback with an Overland Storage NEO 8000(TM) tape library. Mery will discuss the process for evaluating tier one solutions, selecting and implementing the NEO 8000 library and REO 4000(TM) disk-based backup and recovery appliance, and measuring the results.

When: Thursday, Feb. 16, 11 a.m. PST / 2 p.m. EST

Where: To attend this exclusive Overland Storage Webinar, please register online at: <https://overlandstorage.webex.com>, and click on "Backup and Recovery Best Practices."

About Overland Storage

Now in its 25th year, Overland Storage is a market leader and innovative provider of simply protected storage solutions -- smart data protection appliances and software modules designed to work together, affordably, to ensure that information is automatically safe, readily available and always there. Overland's award-winning data protection solutions include the ULTAMUS SERIES(TM) of protected primary storage appliances; the REO SERIES(TM) of disk-based backup and recovery appliances; and the NEO SERIES(R) of tape libraries. Overland sells its products through leading OEMs, commercial distributors, storage integrators and value-added resellers. For more information, visit Overland's web site at www.overlandstorage.com.
